

Owner's Report – January 29th, 2022

Meeting with Neil and Jocelyn on January 18th, 2022. Discussed feedback on recent developments with moving early from CM to CD. Have received some feedback that is not in support of the move but overall, the consensus was that if improvements are going to be made to the track at CD then it is a compromise we can live with.

Further discussion on how to promote/entice new owners to the industry. The interrupted meet at CM caused some issues with trying to organize something for the owners. Would still like to set up a table at significant race meets to answer questions and provide insights into life in the industry as an owner (e.g. Packwood Grand/Stakes events)

Discussed possible event (“Breakfast with the Babies”??) to take place in late Spring/early summer. This event would showcase our new crop of two-year-olds to owners and the public. Looking into this further as to what it would entail. Certainly, would require the cooperation of our owners and CD to make this happen.

How do we leverage the experience/expertise of Sugar Doyle to enhance our product and promote it to further grow out ownership group?
